Professional Summary

Business Analyst with 10 years of experience supporting operational, financial, and regulatory initiatives within the Canadian healthcare sector. Skilled in requirements gathering, data analysis, workflow optimization, and stakeholder communication across private insurers, diagnostic providers, and digital health organizations. Proven ability to improve patient-facing processes, enhance claims workflows, and support compliance within Canada's publicly funded healthcare environment.

Professional Experience

Business Analyst

Sun Life Canada – Health Insurance Division

Toronto, ON

2020 – 2026

- Analyzed private health benefits usage trends to support plan design improvements for dental, vision, and prescription drug coverage not included in provincial insurance.
- Documented end-to-end claims workflows involving members, pharmacies, and provincial coverage integrations.
- Led requirements gathering for enhancements to Sun Life's digital benefits platform, improving direct billing and adjudication accuracy by 15%.
- Collaborated with actuaries to model cost impacts of provincial regulatory changes (e.g., Ontario Drug Benefit updates).
- Developed dashboards tracking member health claims, fraud indicators, and utilization patterns.

Business Analyst – Operations & Quality

Life Labs Medical Laboratories

Toronto, ON

2018 – 2020

- Mapped diagnostic testing workflows across Ontario and BC to improve turnaround times for publicly funded and privately funded lab services.
- Supported integration of new digital requisition systems used by physicians and hospitals.

- Conducted performance analysis on patient service centres, leading to queue optimization and a 12% reduction in wait times.
- Coordinated with provincial health ministries to ensure compliance with Ontario Health and BC MSP billing rules.
- Improved reporting accuracy for lab volumes, billing codes, and service-level compliance metrics.

Business Analyst – Digital Health Solutions

WELL Health Technologies
Vancouver, BC
2016 – 2018

- Supported development of electronic medical record (EMR) features used across outpatient clinics and telehealth environments.
- Analyzed patient usage data to drive improvements in virtual care portals integrated with provincial healthcare systems.
- Gathered requirements from clinic administrators to streamline scheduling, billing, and referral management.
- Designed KPI dashboards monitoring provider performance, patient engagement, and digital care uptake.
- Collaborated with engineering and clinical teams to ensure new digital solutions met privacy and PHIPA/PIPEDA requirements.

Education

Master of Business Administration

Skills

- Healthcare business analysis
- Requirements gathering and documentation
- Process mapping (BPMN, Visio)
- Data analysis (Excel, SQL)
- Health insurance claims workflows
